

## ACH Gateway

Anyone currently processing ACH transactions will find our ACH-GATEway and 24/7 web reporting to be a step above their current provider.

Businesses that are still printing payroll checks or mailing checks to independent contractors, should seriously consider our paperless solutions.

Our ACH-GATEway is ideal for:

- Companies that want to eliminate the costs of printing paper checks.
- Software developers looking for a fast and easy method of processing ACH and Credit Card transactions from their software applications.
- Companies using a 3rd party ACH package that creates a NACHA file for upload to their bank.
- Community banks who are looking for a Check21 or ACH outsource service.

No more printing checks, wasting paper, time, ink, manpower and postage. Normal costs for printing checks in-house average \$1.50 or more per check. With our ACH Gateway costs could be 16 cents or less per transaction with Free online transaction reporting.

Does not require any special software purchase, just create a compatible batch file on your system.

Sincerely, Howard Hazelwood – V.P. RDS, Inc. – (800) 266-6305
